

Features tapped holes (4-40 or M3) for easy rear-mounting. (Also available untapped)

Protruded connector face results in a clean, flush mount panel

Sturdy metal housing available in black or nickel plating options

Comes pre-loaded with high quality RJ45 connectors with shielded or unshielded options

RJ45 connectors available in CAT5E, CAT6, or CAT6A versions

Fits standard XLR cutouts for use in standard panels such as Switchcraft part #QGPK1B

## NEW DIECAST OPTION

**THE SWITCHCRAFT RJ45 IS THE INDUSTRY STANDARD** The EH Series is the preferred choice for custom rack panels and OEM equipment alike, and this new expansion adds a rugged, metal housing designed for easy rear mounting. The design results in a cleaner look with enhanced durability. Now available in over 30 configurations including multiple threading options, finishes, and data transmission specifications.

### DURABLE DIECAST METAL HOUSING

The thick, solid metal housing was designed to stand up to the most demanding applications

### EASY TO INTEGRATE IN ANY PANEL

The flexible design can be utilized in a wide variety of readily-available standard panels or integrated into OEM products.

### SWITCHCRAFT QUALITY

Switchcraft connectors have been trusted in critical applications all over the world for over 70 years.
